*Nordic Energy Services, LLC procures 100% of its power from the New England System Mix. Total Power Sources may not equal 100% due to rounding.

Air **Emissions**

Carbon dioxide (CO₂), nitrogen oxide (NO_x) , and sulfur dioxide (SO_2) emission rates from these sources, relative to the regional average, and to the emission rates of a new generating unit.

Lower Emissions

Labor **Information**

- 0% of the electricity associated with Nordic Energy came from power sources that used replacement labor during disputes between 1/1/17-12/31/17.
- 31% of the electricity associated with Nordic Energy came from power sources with union contracts with their employees 1/1/17-12/31/17.

NOTES:

1. Electricity customers in New England are served by an integrated power grid, not particular generating units. The above information is based on the most recently available information for the NEPOOL Generation

- Information System. Nordic Energy procures all of its electricity supply through system power contracts from the system, not from specific generating units.
- 2. See reverse side and your Terms of Service for further information on this label.
